

IN MEMORY OF SNJEŽANA KNEZIĆ

Snježana Knezić's involvement with TIEMS started in 2007 at that year's TIEMS Annual Conference in Trogir, Croatia. Since then, she served in various positions on the TIEMS Board of Directors, and she was an essential contributor to all of TIEMS's research & development projects she was involved in. She held the positions of Acting Vice President and Director of Research and Development for TIEMS until a month ago, when illness forced her to stop working.

Wherever Snjezana served in any position or activity, she did so with dedication, professionalism, and sincerity. Her work was of the highest quality, and she was a pleasure to work with. She listened carefully, was understanding and supportive, and she resolved issues and led teams without excessive self-promotion and with a good sense of humor. She was great person, and TIEMS as an organization and each individual member owe her a lot. She will be truly missed.

Although we admire and appreciate her work for TIEMS, family was her priority. All of us in TIEMS send our deepfelt and sincere condolences to her family, who has suffered an irreplaceable loss. We share with them her memory, which will live forever.

May her soul rest in eternal peace.
